

L'Offensive Sciences Wissenschaftsoffensive

POST-DOCTORAL POSITION

The project “Neurogenesis and Neuroprotection” is one of the *Excellence Projects* laureates of the Offensive Sciences 2012 and granted by the European Regional Development Fund (ERDF) within the framework of the INTERREG Upper Rhine Program. The Consortium Neuro-Rhine (coordinated by Mensah-Nyagan AG, Strasbourg, France) in charge of the project is composed of 10 laboratories located in Germany, Switzerland and France.

Funding is available for a postdoctoral researcher to perform a multidisciplinary and translational study to characterize novel neuroprotectors and/or neurogenic agents for the development of innovative therapies against neurodegenerative disorders and peripheral neuropathies. We are urgently seeking for a candidate having a strong expertise in both molecular/cellular biology and behavioral studies.

The successful fellow will join the laboratory of Professor Mensah-Nyagan in Strasbourg (France) for 2 years starting as soon as possible. Since the project is an international one, the candidate will have the opportunity to interact with various partners of the Consortium Neuro-Rhine. The research unit directed by Professor Mensah-Nyagan has recently been labeled by INSERM (*Institut National de la Santé et de la Recherche Médicale*). Therefore, in case the successful candidate has an excellent CV and is well motivated during the postdoctoral period, he/she can also be supported by the research unit for an application to a permanent researcher position at INSERM. Interested applicants should send their CV, motivation letter and contact information to gmensah@unistra.fr
