

## SEMINAIRE

Le Mercredi 20 juin 2012 à 11h00  
Salle de Réunion (4B14) Bâtiment de Recherche  
Faculté de Médecine et de Pharmacie de Rouen

Séminaire :  
«**The TRAILS study: eating disorders and anxiety in  
adolescents** »

**Ms F.V.A. van Oort, PhD**  
**Erasmus Medical Center, Dept. Child and Adolescent  
Psychiatry/Psychology, Rotterdam, the Netherlands**

*TRAILS is a large cohort study that follows 2230 children (10y) into adulthood (25y). Four assessments took place between ages 10 and 20y, and the fifth assessment is ongoing. In TRAILS we collect biological data (anthropometrics, cognition, metabolic measures, lung function, genetic information), questionnaire data on stress exposures, temperament etc, and psychiatric outcomes (clinical interview). In this presentation I will present findings so far on the development of obesity and eating disorders, as well as findings on the development of anxiety.*

**Laboratoire Inserm UMR1073,  
Nutrition, inflammation et dysfonction de l'axe intestin-cerveau.  
Institut de Recherche et d'Innovation Biomédicale (IRIB)  
Haute Normandie**
